Some issues on Gödel's unpublished philosophical manuscripts.

In: Collegium Logicum. Annals of the Kurt-Gödel-Society. Vol. 1. Wien: Springer-Verlag, (ISBN 3-211-82646-7). 8-25 (1995).

This penetrating essay discusses – based on published and unpublished material – two of the most important issues concerning Gödel's philosophy of mathematics: the thesis that mathematical propositions are analytical and the thesis that there exists a close analogy between the formal (mathematics) and the empirical sciences (physics). A. Garciadiago (Mexico).
