Dov Gabbay: "I am a logic". An interview with Dov Gabbay.

In: Ohlbach, Hans Jürgen (ed.) et al., *Logic, language and reasoning. Essays in honour of Dov Gabbay*. Dordrecht: Kluwer Academic Publishers, (ISBN 0-7923-5687-X/hbk). Trends Log. Stud. Log. Libr. 5, 1-12 (1999).

Very successfully, Gerbrandy and Mineur transcribe an interview with Dov Gabbay. This paper reads as a very lucid, vivid, personal and casual set of recollections. This is not the place to search for specific biographical data or complex intellectual developments. Instead, one finds Gabbay speaking, freely and informally, on his personal and professional evolution and his conception of different times, ideas, projects and branches of mathematics.
