

03A Philosophical and critical

Dieterle, J. M.

03002

Supervenience and necessity: A response to Balaguer.

Philos. Math. (3) 8, No. 3, 302-309 (2000).

From the abstract: Dieterle "argue[s] that [Balaguer] [*M. Balaguer, Platonism and anti-Platonism in mathematics. Oxford: Oxford Univ. Press (1998; Zbl 927.03006)*] cannot use logical, conceptual, or nomological necessity to explicate supervenience. Balaguer must either give up the arguments that make use of supervenience or accept metaphysical necessity".

Alejandro Garzadiego (México).
