

Thomas, Robert S. D.

00010

Mathematics and fiction. I: Identification.

Log. Anal., Nouv. Sér. 43, No. 171-172, 301-340 (2000).

According to the author: "The object of this paper and its sequel is to study and account for the analogy, drawn positively and negatively, between mathematics and fiction and consider fictionalism, the categorization of mathematics as fiction" [p. 301].
